waste), but emission regulations that limit air ...

Disinfection, Sterilization, and Control of Hospital Waste

3.2 Selection of Waste Management Options In an infectious waste management system, there are a number of areas in which alternative options are available (e.g., treatment techniques for the various types of infectious waste, types of treatment equipment, treatment sites, various waste handling practices, etc.).

EPA Guide For Infectious Waste Management

Biomedical Waste Situation in India. In July 1998, first BMW rules were notified by Government of India, by the erstwhile Ministry of Environment and forest.[1] In India, BMW problem was further compounded by the presence of scavengers who sort out open, unprotected health-care waste with no gloves, masks, or shoes for recycling, and second, reuse of syringe without appropriate sterilization.[1]

Biomedical waste management in India: Critical appraisal

All waste must be disposed of according to the Waste Disposal Procedures. If any of this information is unclear, contact Environmental Health and Safety (EHS) before disposing of waste.

turns plastics to alkanes and CO₂ separately. • The advanced oxidation of plastic waste shows a bright prospect in the future.

Conversion of plastic waste into fuels: A critical review ...

A widely used method for heat sterilization is the autoclave, sometimes called a converter or steam sterilizer. Autoclaves use steam heated to 121–134 °C (250–273 °F) under pressure. To achieve sterility, the article is placed in a chamber and heated by injected steam until the article reaches a temperature and time setpoint.
